(54) IMAGE-FORMING APPARATUS AND MANUFACTURING METHOD THEREFOR

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an image-forming apparatus equipped with a spacer than can support the front and rear plates with a stability, and its manufacturing method.

SOLUTION: In this image-forming apparatus 1 that is equipped with a back board 2 mounting an electron emission device 8, a front board 3 mounting a fluorescent substance 7 and facing the back board 2, a spacer 6 placed between the back board 2 and front board 3, and forms an image by illuminating electrons emitted from the electron emission device 8 onto the fluorescent substance 7, the spacer 6 is molded in a single body with the front board 3 and together, in such a manner that width of the spacer 6 is molded with the edge part of the back board 2 being set wider than that of the front board 3.
